About Us

Keech Engineering, a partnership between Tom and Jason Keech, have been manufacturing guillotines and folders in St Marys, Sydney for over 15 years.

Between them, Tom & Jason have over 50 years experience in the design and manufacture of these products.

We design and manufacture guillotines and folders custom made - you tell us your specific requirements and we'll produce a machine which will optimize your production needs. We also supply the necessary service, advice and spare parts. Guillotine replacement blades up to 3m are kept in stock.

If your needs are small or intermittent, you can subcontract your guillotine and folding needs to us. Perhaps we could help you in the general engineering area. The machinery we have available are: lathe, milling machines, welders (cut internal keyways), auto saw and many drilling machines.

All machines are fully guaranteed and year in year out reliability is assured.

All Keech Guillotines and Folders
are Proudly made in Australia
